

DCDQ '07 Score Sheet

1. **Calculate the DCDQ total score** by adding each response for Items 1 through 15 from the completed DCDQ '07 form (the total score will be between 15 and 75).
2. **Calculate the child's current age** in years and months.

	Year	Month	Example Data	Year	Month
A. DCDQ Completion Date	YY	MM*	May (05) 2025 (25)	25	05* (05 + 12 = 17)
B. Child's Date of Birth (DOB)	YY	MM	October (10) of 2017 (17)	17	10
C. Chronological Age: A - B = C	YY	MM	8 years 7 months	8 years	17 - 10 = 7 months
* If Completion Date Month (A) is less than Child's DOB Month (B), then add 12 months to (A).					

3. **Determine if DCDQ score indicates possible DCD.** If results indicate possible DCD, discuss potential referral for additional assessment/diagnosis and/or treatment for specific needs of the child with their parent or caregiver.

Interpretation of DCDQ '07 Score		
Chronological Age	Indication of Possible DCD* (DCDQ Score)	Probably Not DCD (DCDQ Score)
5 yrs 0 mo to 7 yrs 11 mo	15 to 46	47 to 75
8 yrs 0 mo to 9 yrs 11 mo	15 to 55	56 to 75
10 yrs 0 mo to 15 yrs	15 to 57	58 to 75
